

TRUST

It's what we earn by delivering quality. It's what develops when we provide better features at a better value. It's what happens when our product innovations change entire industries. And it's what we help you build every day, when a little girl hugs her dad after a ride in her child seat. Or when a trucker makes it home after a long haul. Or when millions of other people the whole world over buckle up in one of our occupant safety systems.

QUALITY WITH NO RESTRAINT

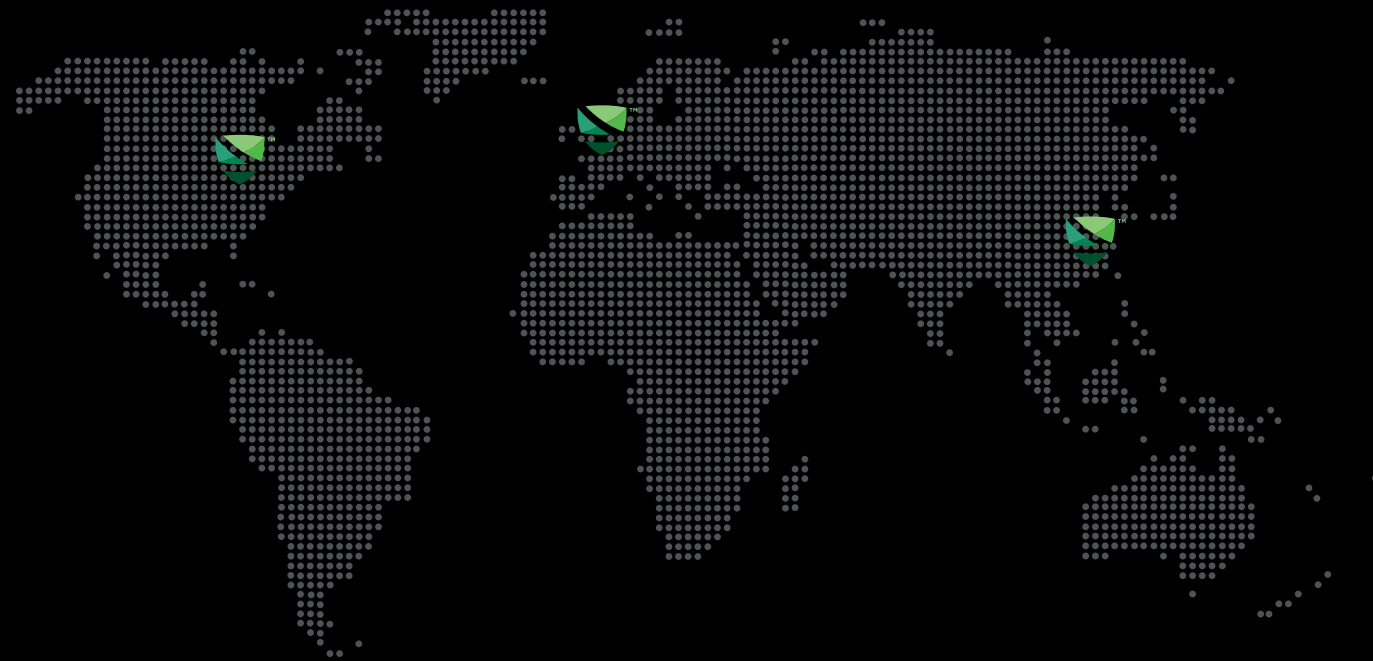

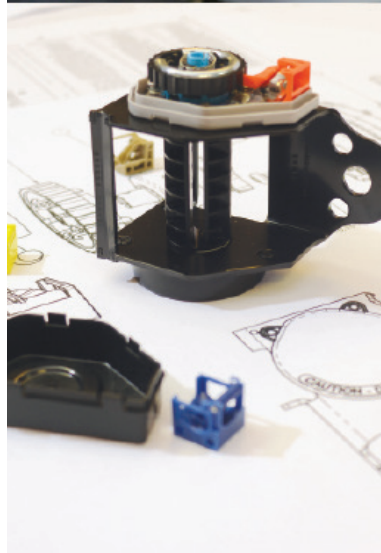

When your sole responsibility is keeping passengers safe, outstanding product performance and reliability has to be your top priority. We deliver on this promise through robust engineering and uncommon rigor in production control through the SHIELD Production System (SPS), our "built in lean" manufacturing process. To further ensure excellence, SHIELD employs automotive quality tools-including Advanced Product Quality Planning-and goes well beyond regulatory requirements to validate your products. Of course, all our facilities carry ISO 9001:2008 certification.

We also believe that the idea of quality extends to how we treat our customers, supplier partners and co-workers. We strive to be helpful and humble in everything we do, in a sincere effort to positively influence all the people we come in contact with.

EXCEPTIONAL PERFORMANCE AND VALUE

Nothing SHIELD makes goes out the door without thorough, confidential testing for ride comfort, durability and misuse/abuse. We use on- and off-site test tracks, as well as a mobile laboratory that can quickly acquire data in actual field conditions. From harsh vibrations and extreme temperatures to dust, mud, and milk and cookie crumbs - we've seen it all.

CHILD SAFETY RESTRAINTS

SHIELD 
Trusted. Everywhere.

ABOUT SHIELD

Around the world, leading vehicle manufacturers, seating providers, aftermarket distributors and child safety seat manufacturers trust SHIELD for quality occupant safety systems and restraints. Just like you, we care deeply about the safety of your customers. Our global team of experts is close by, offering complete in-house design, development and testing capabilities to ensure outstanding product performance and reliability. We produce more than 15 million seatbelts a year, all rigorously engineered, tested and delivered on time at fair prices with great customer service. Delivering practical, affordable, yet innovative solutions-beyond your expectations-is what SHIELD is all about.

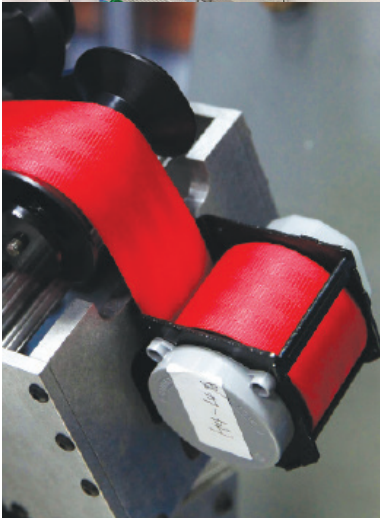

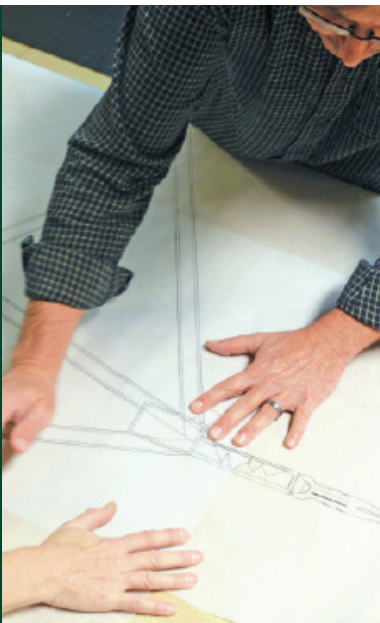

OUR PRODUCTS

Our Child Safety Restraints cover solutions to secure children into the child seat, as well as anchoring systems to securely fit the child seat in the vehicle. We provide world wide solutions for ECE R44 and R129 (iSize), FMVSS/ CMVSS 213, AS/NZS 1754 and GB 27887 regulated markets.

Developed to meet the most stringent quality requirements, our products offer attractive styling combined with easy to use features. Our Easy Pull DP latch connectors are renowned for its ease of use and excellent style and finish. Our isofix connectors are light-weight and have a slim tip to easily access the anchors in the vehicle. The top tethers we supply provide easy adjustment using push button or tilt lock adjusters.

Our buckles provide a comfortable fit thanks to the compact style and superb finish. They secure the harnesses around the child and feature easy latching and opening operations. The wide variety of adjusters offer you a reliable solution to adjust the harness and fit the straps snugly around the child's body. If needed we can produce a specific solution for you to fit your seat designs.

Should you have your own safety concept that could fit our design and manufacturing capabilities, let's work together to design, engineer, test and build the custom safety solution you need - on time and at a great value. Call us for a consultation, or to schedule a visit to one of our world-class facilities.
